

Create Your Living Will in Minutes

A living will allows you make written instructions now about the various types of life sustaining medical treatment that you would like to receive should you ever become incapacitated and unable to communicate your wishes at that time. Doctors and medical personnel are generally obliged to follow these instructions in the administration of your medical treatment.

In this book, we will look at the various legalities surrounding the making of living wills, when they come into operation and what types of medical procedures they cover. We also take a close look at related documents such as healthcare powers of attorney, do-not-resuscitate orders and organ donation cards.

You will also be provided with step-by-step instructions, detailed information and all the legal forms necessary to prepare your own living will. So don't wait until its too late to put one in place.....you may end up undergoing a procedure that you would never have approved of had you been able to make the decision yourself!!!
